Sessions at a Glance

A. Cybersecurity Leadership
Leading in a fragmented, interdependent world
• Opening Keynote: Cybersecurity 2032 — Accelerating the Evolution of Cybersecurity
• Gartner Keynote: How to Get People to Care About Security and Risk
• Develop an Actionable Workforce Strategy for Cybersecurity
• Three Neuroscientific Ideas to Supercharge Your Diversity, Equity and Inclusion Programs
• Share the Load: How to Turn Your Business Partners Into Advocates
• Stop Reporting Operational Metrics to the C-Suite, Really — Stop
• Outlook for Identity and Access Management 2022
• How to Better Prepare and Respond to the Evolving Threat Landscape
• Security Metrics From End-to-End Operational Excellence to Business-Outcome-Driven
• Protection From the Risk Within: Managing Insider Risk
• Treat Cybersecurity as a Business Investment
• Weaponize Risk Appetite to Drive Risk Decisions
• Outlook for Organizational Resilience
• Leadership Vision for Security and Risk Management 2022
• The Top Cybersecurity Predictions for 2022-2023
• Eight Signs That You Have Security-Conscious Corporate Culture
• Security Strategy Planning Best Practices
• The Outlook for Human Factors in Security

B. Infrastructure Security and Operations
Reframing and simplifying a new direction for your security programs and operations
• Outlook for Cloud Security
• Charting the Future of Cloud-Native Security Operations
• What Does the Future Hold for SecOps?
• How SASE, XDR and Security Vendor Consolidation Are Shaping Your Security Strategy
• Beyond Perimeters: Integrate Security Tools With a Cybersecurity Mesh Architecture
• Introduction to Privileged Access Management
• Outlook for Security Operations 2022
• Outlook for Network Security 2022
• Developing a Strategy for SASE Adoption to Securely Enable the Anywhere Workforce
• A Pragmatic Approach to Implementing a Zero Trust Security Architecture
• Outlook for Endpoint Security 2022

C. Application and Data Security
Managing risks of applications and data in a dynamic and uncertain world
• Encrypting Data in the Cloud Is Fraught With Difficult Choices
• How to Secure Your Data Using Data Security Platforms
• Outlook for Application Security 2022
• Fix What Matters: Provide DevOps Teams With Risk-Prioritized Vulnerability Guidance
• Enabling Cloud-Native DevSecOps
• Outlook for Data Security
• Managing Open Source Software Risks in DevSecOps Environments
• Crypto-Agility: Why You Should Give a Damn!
• Protect What Matters: Why You Need ROT Analysis in All Your DLP/DAG Programs
• DevSecOps: The Future of the SOC Is Automation — Isn’t It?
D. Cyber and IT Risk
Continuously monitoring and adjusting to ensure stability
- Ten Cyber and IT Risk Fundamentals You Must Get Right
- A Guide to Navigating the Vendor Risk Management Market
- Managing Your ESG and Carbon Risks From Your IT Vendors
- A New Look at Insider Risk
- The State of Fraud Detection in 2021
- Cyber-Physical Systems Security: Top 10 Must-Do's
- Technology Supply Chain Risk Management: Where Do I Start?
- Top Cyber Risk Projects for 2022-2023 to Thrive in a Constantly Evolving Risk Environment
- Outlook for Privacy, 2022-2023
- Ransomware Is Changing: Are You Ready?
- Crossfire Debate: Current Threat Landscape and the Shape of the World
- Data Residency Workshop: Managing Data in the Cloud for Europe, China, Russia and India

E. Technical Insights for Security Practitioners
Ensuring operational success with deep technical strategy, architecture and deployment guidance
- API Access Control 201: Architect a Modern API Access Control Strategy
- Machine Identities, Secrets, Keys and Certificates: The Team, the Process and the Tools
- How to Evolve Your Identity Fabric to Achieve Identity-First Security
- Adversary-Generated Threat Intelligence
- Don’t Get Burned by the Next Sunburst: How the Network Can Detect Supply Chain Attacks
- Technical Insights: Working From Home Securely — You Need More Than ZTNA
- Five Steps to Start the Zero Trust Journey
- Technical Insights: Do I Buy an SSE Product From a CASB Vendor or SWG Vendor?

F. The CISO Circle*
Advancing your security leadership: An exclusive forum for chief information security officers (CISOs)
- Roundtable: How to Nudge People to Care More About Security and Risk
- Workshop: Optimize Your Cybersecurity Tool Portfolio
- Workshop: Building Risk, Value and Cost Charts for Cybersecurity
- Leadership Exchange: Mock Board Presentation — The Three Stages of Reporting Cybersecurity to Your Board
- Research Discussion: The CISO's Guide to Cyber Risk Quantification
