A. Leadership Strategies for the Future of Business Solutions

- Strategic Architecture Roadmap to the Composable Future of Applications
- The Next Evolution of Enterprise Applications
- The Evolving Role of Application Megavendors in a Composable Business
- Reengineering the Decision: How Data and Analytics Drive Better, Smarter Business Decisions
- Application and Software Engineering Leaders Must Disrupt Their Organizations to Enter the Future of Applications
- Prepare for the Composable Enterprise With APIs, Marketplaces and Ecosystem Creation
- How to Deliver an Application Composition Platform (and Why)
- Pave the Road to the Future of Application Development With Business Architecture
- Use Zero-Based Principals to Refocus Portfolios on Strategic Business Initiatives
- Prioritizing Investments to Enable Composable Business
- Building Trust, Belonging and Psychological Safety to Boost Mental Health in the Workplace
- Driving Business Outcomes to Enable Smarter Spending
- How to Navigate the Roadmap to the Composable Future of Applications
- How to Achieve the “Composable Enterprise” Using a Composable Architecture
- Optimize Risk, Value and Cost in a Business Context to Prioritize Portfolio Investments
- Clinic: How to Use Gartner BuySmart™ or Your Vendor Negotiations to Optimize Costs and Mitigate Risks

B. Architectural Models and Tools Supporting Your Composable Applications

- How to Optimize Your Application Portfolio to Prepare the Way for the Composable Enterprise
- Cloud-Native and Multicloud: Buzzwords or Key Principles for Your Cloud Strategy?
- When Should You Use Microservices?
- API Security: How to protect Your Organization From “Leaky APIs”
- Technical Insights: Get a Grip — How to Govern Services, APIs and Events Without Killing Productivity
- What Is Composable ERP?
- Where to Run Your Code? Comparative Analysis of VMs, Containers and Serverless Functions
- Enhance Your SRE Success With Chaos Engineering
- Top Trends in PaaS and Platform Innovation, 2021
- Technical Insights: API Gateway vs. Ingress Proxy vs. Service Mesh. Which Should You Use?
- Technical Insights: Running Applications With Containers, Kubernetes and Serverless Platforms

C. Software Engineering and Integration Tactics in the Age of Agility

- How to Help Software Engineering Teams Modernize Their Application Development Skills
- Software Engineering Strategies for Packaged Business Applications
- Technical Insights: A Modern Approach to Integration
- How to Succeed With Code-Based Approaches to Integration
- Technical Insights: Five (or More) Key Microservices Pitfalls and How to Avoid Them
- Technical Insights: Optimize Your SDLC and Agile Initiatives With Metrics
Sessions at a Glance

D. Artificial Intelligence and Other Transformative Technologies

- AI Engineering: How to Propel AI from Prototypes to Scalable Value Generators
- The Five Habits of Organizations Successful in Artificial Intelligence
- Strategic Roadmap to the Language-Enabled Enterprise
- Top 5 Priorities for Managing AI Risk Within the Gartner MOST Framework
- Innovating With IoT: Practical Strategies and Policies for Composable Applications
- Technical Insights: Operationalization Key to Successful Leveraging of AI Within Enterprise Applications
- 8 Technology Innovations That Will Disrupt Your Application Strategies
- Software Engineers Toolkit for Hyperautomation
- Technical Insights: Chatbot Development
- How to Identify the Right Use Case for Your AI Project

E. Delivering Next-Generation Total Experience

- Total Experience Is Your Differentiator in the Digital Experience Economy
- Leading Customer Experience in a Composable World
- How COVID-19 Changed CX and Software Engineering in Digital Commerce
- Future-Proof Your Tech Stack With a Composable DXP
- Digital Workplace Frameworks Unify Your Disconnected Employee Technologies
- Total Experience Transformation Starts With Business Architecture
- Digital Optimization Is the Final Frontier of B2B Customer Experience
- Build Better Products Faster With Design Systems
- Using Collaboration and Engagement to Scale Digital Experience Strategies
- What Application Leaders Need To Know About Customer Experience
- Bridging the Gap Between IT and the Business for Customer Experience and CRM Programs
- Research Discussion: Driving Responsiveness and Customer Centricity in the Product Model
