Gartner Catalyst Conference
August 12 – 15, 2019 | San Diego, CA
gartner.com/us/catalyst

Transform IT to Architect and Secure Your Digital Foundation

Save $350 when you register by June 14, 2019
Roll up your sleeves and explore the topics and trends most important to you

**IT professionals: Learn how to architect, secure and transform**

The digital disruption we’re facing right now demands new IT skill sets, methodologies and processes. Major technology shifts are challenging you to manage and secure the exponential growth of data, devices and options for users who are empowered to choose their own solutions and applications.

As an architect and builder of IT, the questions is not just how will you stay ahead of these changes, but how will you seize the opportunities created by them?

At Gartner Catalyst Conference, August 12 – 15, in San Diego, CA, you’ll dive into one-of-a-kind learning experiences and proactive guidance you won’t find anywhere else — for every technical role and responsibility.

- Cloud computing, infrastructure and edge computing
- DevOps, agile and APIs
- Data, analytics, Internet of Things (IoT) and machine learning (ML)
- Software development, application platforms and architecture, and CRM
- Collaboration, content and mobility (CCM)
- Cybersecurity, risk management, and identity and access management (IAM)
Who should attend Catalyst Conference?

Built with teams in mind, Catalyst is the must-attend conference for IT professionals in the following roles who want to build a solid digital foundation for what's next:

- Applications
- Security and risk
- Technical and solution architects
- Software developers
- Infrastructure and operations (I&O)
- Data and analytics

What to expect at this year's conference

- Expanded Bake-Off — with expanded focus on DevOps
- NEW Agile Fluency™ Game
- More TechDemos
- New Gartner research, including Solution Comparison reports and Cloud Decisions Framework
- Expanded Women in IT Program
- Futures in IT Program
- Midsize Enterprise Program (MSE)
- TechExec interview
- Inspirational speakers including Nonny de la Peña and Erik Qualman
- NEW professional development sessions
- Expanded TechZone show floor hours featuring new Gartner and exhibitor content
- NEW Show Floor Showdown
- Expanded theater sessions

“I’ve been a Gartner subscriber for years and have always been impressed with the depth and breadth of knowledge. I always meet other IT professionals at Gartner conferences who add to my knowledge.”

Allan Marcus, Solutions Architect, Los Alamos National Laboratory, 2018 attendee

Bring Gartner for Technical Professionals research to life

What is Gartner for Technical Professionals?

Gartner for Technical Professionals (GTP) provides the insights, guidance and best practices you need to deliver flawless execution and outstanding results on the initiatives that support your IT strategy. Our in-depth technical expertise equips IT practitioners and technical teams with information across the entire project life cycle, from technical strategy to architecture to project execution.

Gartner Catalyst Conference takes a deep dive into technical trends and topics that are the most challenging for IT today, offering a dynamic live context where you can ask questions, vet ideas and proactively problem-solve with Gartner experts and your peers.

Built on leading-edge Gartner for Technical Professionals research, the conference provides a holistic view across a broad range of IT topics. You’ll experience the power of our technically focused research and objective advice, and leave with a blueprint for project planning and execution.

The conference agenda is created specifically for the technical professional, to help you meet today’s most critical challenges and position your enterprise for digital success.

“This was my first Catalyst Conference, and it has been fantastic. Extremely well-informed speakers, and it opens your mind to a wealth of information, as well as how you could adopt new technology into strategic initiatives.”

MaryAnn Silva, California Department of Correction and Rehabilitation, 2018 attendee

Truth and Reach: Scaling Storytelling in Virtual and Augmented Reality
Tuesday, August 13 | 8:30 a.m.
Nonny de la Peña, founder of Emblematic Group and New America Fellow, talks about her experience as a pioneer of storytelling in virtual and augmented reality. Reflecting on how her career has continuously evolved with technology, she dives into Emblematic’s new project, Reach, a platform built using WebVR/AR technology that will scale volumetric content authorship and distribution in a new way.

Nonny de la Peña
Virtual Reality Pioneer

How to Focus in an Unfocused World
Wednesday, August 14 | 8:30 a.m.
What’s the difference between winners and losers in a digitally distracted society? Focus. Winners focus on what matters most. While simple, it’s not easy. The No. 1 killer of promising careers, teams and businesses is a lack of focus. We either try to do too much, or we put our time, treasures, and trust into the wrong buckets. Erik Qualman shares specific focus techniques used by the world’s most successful people and organizations.

Erik Qualman
Best-Selling Author and Futurist

Gartner keynote

Opening Keynote: Rethink IT — Architecting for Connected Intelligence
Monday, August 12 | 8:30 a.m.
The day has come when physical meets digital, and digital is an augmented reality. Intelligent infrastructure applications and augmented analytics are now everywhere and must be securely connected. Technical professionals must rethink IT and architect the connected intelligence era.

**Agenda tracks**

**A** Infrastructure Strategies: Data Center, Cloud and Edge Computing
By 2024, most organizations will have a significant amount of their data processing executing in someone else’s data center. How can IT professionals not only keep their own data centers running well, but plan for and successfully navigate their way through all of this upcoming change? Gain insights to optimize on-premises data centers, integrate with third-party cloud platforms and applications, and embrace edge computing.

**B** Modernize Cloud and Data Center Operations Through Automation and DevOps
Public cloud and DevOps have increased the pace of business. I&O must automate processes and tools across hybrid and multicloud environments to accelerate application delivery. Uncover techniques to use automation, AI, platform ops and cloud management tools.

**C** Implement Cybersecurity and Identity Architectures for Your Digital Business
Cybersecurity remains a top concern for management as IT continues the move to the cloud. Learn about the latest developments across DevSecOps, O365 security, cloud security and IAM, and how to leverage vendors to solve for specific business challenges.

**D** Productivity Suites, Collaboration Tools and SaaS: Enabling the Digital Workplace
Cloud-based applications promise to revolutionize the digital workplace. New tools like SaaS offerings and the growing Office 365 portfolio require new thinking for development, implementation, management, adoption and troubleshooting. Discover how to handle the changes created by cloud-based applications.

**E** Modernize End-User Technologies for Improved Productivity
From mobility to cloud-based virtual desktops and voice-based virtual assistants with a sprinkle of Windows 10; the rate of change for end users continues to accelerate. Assess how to utilize this change to improve user — and administrator — productivity.

**F** Apply Agile Development, DevOps and CX to Build Modern Applications
Today, business requires innovative applications that provide a great customer experience (CX) across multiple channels. How can agile application architecture and development practices help you adapt quickly to these new demands? Learn how to create agile architecture, implement DevOps and adopt CX practices that enable the next generation of applications.

**Hot topics by track**

- Cloud
- Hyperconverged
- Edge
- Containers
- Cloud networking
- SD-WAN
- DevOps
- Platform ops
- Automation
- Infrastructure provisioning
- CI/CD
- Office 365 security
- Cloud security
- DevSecOps
- CIAM
- Identity analytics
- Office 365
- Cloud CRM
- Microsoft Teams
- Cloud content storage
- Unified endpoint management
- Windows 10
- Virtual assistants
- Virtual desktops
- Agile
- DevOps
- APIs
- CX
- Chatbots
**G**

**Architect Cloud-Native Applications for Speed and Agility**
Seventy-five percent of organizations are either rebuilding or rearchitecting their applications to adopt cloud. Because cloud computing has a different set of constraints than traditional data center infrastructure, it requires more than a lift and shift to reap the benefits. Learn how to architect your applications from the ground up with cloud in mind.

- Microservices
- Cloud-native
- DevOps
- Containers
- Kubernetes
- Serverless

**H**

**Build a Modern Data and Integration Architecture**
Increasing data volume, variety and velocity require organizations to implement data management architecture that empowers employees and improves customer experiences. How can a cohesive approach to application integration increase data service efficiency within highly connected digital ecosystems? Dive deep into technology trends and best practices in data management and application integration.

- Data integration
- Logical data warehouse
- Application integration
- Microservices
- Streaming
- Enterprise information management
- Data modeling

**I**

**From BI to AI to Automation: The Impact of ML in Transforming Business Analytics**
Harnessing the power of ML to build innovative AI solutions has become critical to be a disruptor within the marketplace. Standing still is no longer an option, so let’s get real. Gain pragmatic guidance on how to design the next generation of analytic architectures and services in order to transform and secure your digital organization.

- Self-service BI
- Operationalizing ML
- Augmented analytics
- Text mining
- AI
- IoT ML

**J**

**Enhance Your Skills to Lead Digital Transformation**
If culture is the No. 1 roadblock to digital transformation, then creating an environment of agility and innovation must happen at the intersection of technology and employee behavior. From operations and data management to cloud security, discover strategies that elevate employees’ skills to embrace change and improve digital adoption.

- DevOps
- Platform ops
- Automation
- Office 365
- Cloud security
- Operationalizing ML

**Customize your agenda**

**Gartner Conference Navigator**
Gartner Conference Navigator helps you organize, view and create a custom agenda based on:
- Date and time
- Session descriptions
- Track
- Key initiatives
- Experts/speakers
- Vertical industries

Log in at gartner.com/us/catalyst to use Conference Navigator, or download the mobile app.
Conference features

“The quality and experience each speaker brings is invaluable. Also, each vendor is extremely open and willing to listen to your unique challenge, and look to provide a solution.”

Rich DeCoste, Senior Product Development Manager, EPIQ Global

Expert interaction

**Gartner one-on-one meetings***
Gain targeted advice on your toughest challenges. Discover the best way to move forward on critical work issues you’re currently facing at a Gartner one-on-one meeting. Your take-away: actionable solutions that speak specifically to your situation.

As a Gartner conference attendee, you are entitled to up to two private, 30-minute consultations with an expert of your choice. These sessions are a great way to reinforce lessons learned and how-to recommendations presented throughout the conference. As our attendees tell us, Gartner one-on-one meetings are worth the price of admission all by themselves. (Preregistration is required.)

**Ask the Expert sessions***
Bring your questions to a Gartner expert in a group forum where you’ll also learn from the questions asked by your fellow IT professionals. (Preregistration is required.)

**Workshops***
These sessions are small-scale and interactive—drill down on specific topics with a how-to focus. (Preregistration is required.)

**Roundtables***
These topic-driven end-user forums are moderated by Gartner experts. Learn what your peers are doing around particular issues and across industries. (Preregistration is required.)

*Preregistration is required for all of the above session types. Once you’ve registered for the conference, log in at gartner.com/us/catalyst to preregister for these sessions.
**Peer interaction**

**Inspirational guest speakers**
Let visionary thinkers pollinate your mind with new ideas and uplifting stories about how you can thrive in a world of disruption.

**Peer Meetups**
Problem-solve with peers who are facing challenges similar to your own — no facilitation, no vendor influence, no pressure.

**NEW Agile Fluency™ Game**
Participate in this hands-on simulation that takes you through the first two and a half years of an agile project.

**Women in IT Program**
Network and strengthen bonds, foster collaboration and empower leadership for women in the field.

**Midsize Enterprise Program**
Address the digital transformation challenges unique to midsize enterprises (MSEs) in this program, which includes sessions and networking discussions on skills development, cost optimization and cross-functional collaboration required for MSE growth.

**Professional development sessions**
Attend sessions woven throughout the agenda that focus on career development.

**Get outside and see the light of day!**
You’ll be in San Diego, after all. Enjoy complimentary yoga class and group runs with fellow attendees.

**Technology evaluation**

**TechZone**
Expanded to two show floors for the first time, meet with today’s leading and emerging solution providers, and get the latest information and demonstrations on new products and services.

**NEW Solution Comparison**
Join Gartner-expert-led labs for an objective side-by-side comparison of the latest third-party solutions right on the show floor.

**TechExec interview**
Hear world-shaping ideas from one of today’s most influential technology executives in an interview-style discussion with a Gartner expert.

**TechDemos**
See how solutions work in the real world with Gartner-expert-led, vendor-neutral demos built right into each session. Ask questions, try it yourself and deepen your understanding of how changing trends impact strategy and execution.

**Solution provider sessions**
Led by Gartner experts, these sessions give an inside view of current marketplace offerings from the solution providers that develop them and clients who deploy them.

**Learning Labs**
Go deeper into the next generation of technology solutions in these interactive labs led by leading vendors held right on the show floors.

**NEW Show Floor Showdown**
See live demonstrations from leading vendors in BI, security, and data and analytics, on how they would solve specific problems, defined and led by Gartner experts.

**Bake-Off**
Watch leading technology providers showcase trends of cloud-native architecture and DevOps delivery. See demonstrations on how their platforms perform and compare.

Premier

Equinix is connecting our global platform for digital business physically and virtually around the world, enabling you to reach everywhere, interconnect everyone and integrate everything. Build here, and you can go anywhere.

NetApp is the data authority for hybrid cloud and provides a full range of hybrid cloud data services that simplify management of apps and data across cloud, on-premises environments to accelerate digital transformation. We empower organizations to unleash the full potential of their data.

Mendix, is the global leader in no-code/low-code application development for the enterprise, and is fundamentally reinventing the way apps are built in the digital enterprise. The Mendix platform promotes intense collaboration between business and IT teams, and accelerates app development cycles, while maintaining the highest standards of security, quality, and governance. Mendix’s ‘Go Make It’ platform is used by over 4,000 leading companies.

Pure Storage helps innovators build a better world with data. Pure’s data solutions enable customers to maximize and deliver powerful data for competitive advantage through quickly adoptable, next-generation technologies including artificial intelligence and machine learning. At the top 1% of B2B companies, Pure’s customers are the happiest in the world.

Platinum

Amazon Web Services (AWS) is the world’s most comprehensive and broadly adopted cloud platform, offering over 165 fully featured services from data centers globally. Millions of customers — including the fastest-growing startups, largest enterprises, and leading government agencies — trust AWS to power their infrastructure, become more agile, and lower costs.

BROADCOM

Broadcom Inc. (NASDAQ: AVGO) is a global technology leader that designs, develops and supplies semiconductor and infrastructure software solutions. For more information, go to www.broadcom.com.

OutSystems

OutSystems is the number one low-code platform for rapid application development. Thousands of customers worldwide trust OutSystems as the only solution that combines the power of low-code development with advanced mobile capabilities, enabling visual development of entire application portfolios that easily integrate with existing systems.

Pivotal

Pivotal Software, Inc. combines our cloud-native platform, developer tools, and unique methodology to help the world’s largest companies transform the way they build and run their most important applications. Our technology is used by Global 2000 companies to achieve strategic advantages in software development and IT operations.

Progress

Progress creates leading platforms for business applications including high-productivity app development, adaptive UX, machine learning, serverless cloud, business rules, web content management and data connectivity. Over 1,700 independent software vendors, 100,000 enterprise customers and two million developers rely on Progress.

Radiant Logic

Based on advanced virtualization, RadiantOne FID federated identity and directory service delivers customizable identity views built from disparate data silos, to successfully secure WAM/cloud/federation deployments.

SAP

As the cloud company powered by SAP HANA®, SAP is market leader in enterprise application software, helping companies of all sizes and industries run better. SAP helps simplify technology for companies of all sizes so they can consume our software the way they want – and without disruption.

ServiceNow

ServiceNow makes work, work better for people. Our cloud-based platform and products streamline and simplify how work gets done. We deliver digital experiences that help people do their best work fast, creating great employee and customer experiences. ServiceNow (NYSE: NOW) works for you. To learn more, visit servicenow.com.
