Gartner Security & Risk Management Summit
18 – 19 May 2020 | Munich, Germany
gartner.com/eu/securityde

Anticipate future security threats, deal with disruptive technologies and build resilience.

**Agenda Programs**

**Management & Strategy**
Prioritizing decisions related to unknown risks and known exposures is a constant challenge in the face of changing business priorities and external pressures. Sessions in this program equip security and risk management leaders with strategies and action plans to set expectations with their teams, business, and third parties. These sessions will discuss top security and risk management trends in 2020, leadership vision for actionable change, and ‘practical use’ versus ‘hype’ use cases for risk quantification.

**Digital Risk Management**
Digital business requires risk professionals to look beyond existing risk registers. New trends such as shifting risk assessment to front line defense; complex third-party risks inventing new governance model and privacy responsibility are descending into every line of defenses. Risk leaders can leverage new digital technologies too. The digital risk management program offers ideas and tools for you to innovate your risk management practices and form action plans.

**Technology & Architecture**
Effective security controls consist of a combination of people, processes and technology. The number of security product and service solutions in the market is truly staggering and is complicated by the evolving range of delivery models. This program will provide insights into the security markets, best practices in adopting and using technology solutions, the potential of new and emerging technologies, and how to architect complex solutions based on a variety of delivery models.

**Hot Topics**

- Understanding the CIO and CEO’s view on security and risk
- Communicating about security and risk to the board
- Security organization dynamics
- Creating security awareness across the organization
- Understanding the threat environment
- Handling the shortage of skilled IT security staff
- Security program governance best practices

- Creating a leadership vision for risk management
- Engaging with your CEO about risk
- Assessing the emerging risks of digital business
- Selecting the right IT risk management solution
- Understanding modern privacy laws
- The future role of risk management
- Risk quantification approaches

**The CISO Circle**
The CISO Circle is an exclusive forum — crafted specifically for CISOs and their peers — providing targeted research, workshops and networking opportunities for peer-to-peer interactions. The CISO Circle brings together Europe’s security and risk leaders for incisive discussions on what matters in security now and what changes lie ahead.

The CISO Circle provides senior security and risk leaders with an exclusive environment to:
- Discuss the expanding role of the CISO
- Learn how to have engaging conversations about security and risk with key stakeholders
- Develop strategies for establishing effective security governance to enable digital transformation
- Expand your network of peers

*Availability is limited, qualification criteria apply.*
