- Improve Operational Excellence
- Grow the Business
- Execute Business Transformations
- Optimize Costs
- Innovate for Success
- Manage Risk and Regulatory Demands
COVID-19 has worsened the reskilling challenge

Traditional ways of predicting skill needs aren’t working. Employees need more skills for every job, and many of those skills are new. Many employees aren’t learning the right new skills — for their personal development or the benefit of the organization.

Data shows the total number of skills required for a single job is increasing year-over-year by 10%.

33% of the skills that were present in an average job posting in 2017 won’t be needed by 2021.

Source: 2020 Gartner Shifting Skills Survey for HR Executives; Gartner TalentNeuron™

Percentage of the Workforce That Has to Use New Skills as a Result of COVID-19

- 29% of the workforce has 40% or less of the new skills needed.
- 71% of the workforce has more than 40% of the new skills needed.

Source: Gartner Coronavirus Polling on L&D

“I moved into a new role because of lay-offs.”

“My organization had to redeploy my team to another area of the business. I am in a brand-new role for me.”

“I have never worked virtually before and I’m now managing a remote team.”

“I have had new responsibilities added to my plate because we are short-staffed but I don’t have experience with these tasks.”

“My company is cross-training us on different roles in case a colleague gets sick or everyone can’t come in at the same time.”
What's needed is a dynamic approach to reskilling and redeploying talent in which all impacted stakeholders work together to sense shifting skill needs and find ways to develop skills at the time of need. Currently, only 21% of HR leaders say peers share accountability or partner with HR to determine future skill needs.

**Skill-Sensing Network**
Facilitate dynamic cross-organizational networks to sense shifting skill needs:
- Share ownership for identifying and addressing skill needs with relevant stakeholders.
- Monitor organizational intelligence on changing skills needs.
- Explore how to leverage labor market data to address skill gaps.

**Targeted Skill Accelerators**
Identify and implement skill accelerators to develop skills at the time of need:
- Recognize and adapt existing resources to develop new skill solutions quickly.
- Identify learning delivery opportunities that will have highest impact on application.

**Two-Way Skill Transparency**
Empower employees with relevant information to make timely skill decisions:
- Create channels for employee and organizational information exchange.
- Enable employees to make informed decisions that align their interests with organizational needs.

With the dynamic approach, employees apply 75% of the new skills they learn (far more than with other approaches) and learning begins sooner, as needs are identified faster.

**Address This Priority:** Reach out for supplemental insights and tools related to building current and future leaders.
Organizational Design and Change Management

Cited by 46% of HR leaders

Organizations can’t respond as quickly as conditions require

Work design, focused for years on efficiency, has left many organizations with rigid structures, workflows, role design and networks that don’t meet today’s needs or flex with fast-changing conditions. Employees suffer the effects in various forms of work “friction.”

Very few HR leaders report that their organizations quickly respond to changing needs

19% of HR leaders report that their workforce can effectively change direction based on changing needs or priorities.

38% of HR leaders believe their workforce can effectively detect when they are working on the right things for customers.

Work friction keeps employees from being responsive

- **Misaligned work design**: I’ve had to create processes for my job where none existed.
- **Overwhelmed teams**: The volume of tasks keeps rising.
- **Trapped resources**: We don’t tweak the operating budget throughout the year once it’s set.
- **Rigid processes**: It takes too long to secure sign-off for new approaches or ideas.

Note: The remaining parts of each graph represent the HR leaders that think otherwise.
New imperative: Redesign work to enable employees to be more responsive

Future-forward work design is what’s needed to ensure employees can be responsive — that is, in sync with customer needs, in a position to anticipate changes in those needs, and adapt their approach and activities accordingly. It’s up to HR leaders to adapt work design strategies to unlock responsiveness at scale across the workforce and build organizational resilience.

How much of an impact you believe each trend will have on your organization over the next 12 months

Unlock organizational capacity by reducing work friction

- Friction 1: Misaligned work design
  - Solution 1: (Re)Align work design with the way work happens by making ongoing adjustments.

- Friction 2: Overwhelmed teams
  - Solution 2: Clarify work design boundaries to improve prioritization of effort.

- Friction 3: Trapped resources
  - Solution 3: Move resourcing decisions closer to the end user to unlock greater resource mobility.

- Friction 4: Rigid processes
  - Solution 4: Formalize how processes can flex to eliminate permission roadblocks.
Current and Future Bench Strength

Cited by 44% of HR leaders

“Our leadership bench is not diverse.”
49%

“Our succession management processes don’t yield the right leaders at the right time.”
35%

“We struggle to develop effective midlevel leaders.”

- Manage Risk and Regulatory Demands
Leadership lacks diversity

44%

Only 44% of employees say they trust their organization’s leaders and managers to navigate a crisis well. Confidence and trust in leadership is also undermined by the lack of diversity.

Gartner TalentNeuron™ data illustrates the lack of diversity among the leadership of U.S. companies, showing that only 10% of senior-level corporate positions are held by a woman from a racial or ethnic minority and only 18% by a man from a minority segment.

Primary barriers to lack of advancement of underrepresented talent

1. Unclear career paths and steps to advancement
2. Not enough exposure to senior leaders
3. Lack of mentors or career support

n = 113 HR leaders
Source: 2020 Gartner Advancing Underrepresented Talent Survey
New imperative: Prioritize diversity networking

Networking is a great way to provide support for employees, but networks often lack diversity in role, skill level and experience — and have limited involvement from senior leaders. Intentionally creating growth-focused diversity networks supports underrepresented talent and yields benefits for individual employees, leadership and the organization.

**Growth-Focused Diversity Networks**

- Intentional, growth-focused approach
- Connections are diverse in role, skills, level and experience
- Exposure to senior leaders who can support growth and advancement

**Organizations that use diversity networking programs, compared to those that do not, are...**

- 1.3x likely to report they are effective at increasing diverse employee engagement.
- 2.0x likely to report they are effective at improving organizational inclusion.
- 3.4x likely to report they are effective at increasing opportunities for talent mobility.

Problem today: Knowing where to start

The COVID-19 pandemic will have a lasting impact on the future of work. The question for HR leaders is how much these trends have and will alter pre-pandemic strategic goals and plans and what immediate action and longer-term adjustments must be made as a result.

9 Future of Work Trends Post-COVID-19

What are the long-term implications of the coronavirus pandemic on the HR function and work?

<table>
<thead>
<tr>
<th>Accelerated Trends</th>
<th>New Impacts</th>
<th>Pendulum Swings</th>
</tr>
</thead>

Employee Experience

Cited by 28% of HR leaders
Cited by 31% of chief human resources officers
Cited by 46% of heads of diversity and inclusion

“Our employee engagement and employee experience strategies.”
29%

“We struggle to assess the impact of our employee experience investments.”
28%

“Our employee value proposition (EVP) doesn’t communicate our employee experience promise.”
25%

Note: The correlation between HR priorities and business priorities is too weak to report because of the way respondents were asked to rank-order their top three business priorities.
Hybrid workforce: Different locations offer different value

The shift to remote work has huge implications for HR. Big concerns are how to preserve company culture with a more distributed workforce, and how to ensure employee experience evolves to keep up with employees’ expectations and needs in a changing environment. Hybrid workforce models are even evolving the value proposition of the office itself versus other work locations.

Nearly half of employees will work remotely at least some of the time.

- 30% Pre-pandemic
- 48% Post-pandemic

New imperative: Tackle employee experience impact of remote work

Hybrid workforce models aren’t only about selecting one location over another; they provide an opportunity for employers, managers and employees to share ownership of location decisions around a common expectation that employees can switch locations dynamically depending on what makes the most sense to drive the highest levels of productivity and engagement. To improve employee experience, organizations have to support and enable this approach throughout the employee life cycle.

Employee experience
Adapting the employee life cycle for a hybrid workforce

Where and how do we invest in the employee life cycle for greatest returns on a hybrid workforce?

- Improved employee engagement
- Expanded career options
- Improved well-being

<table>

</table>
Look ahead: Key themes for 2021

01 The New World of Remote
HR must move beyond simple questions of how remote work operates to more important questions of critical managerial and leadership roles and responsibilities, new organization structures and virtual HR strategies to create effective organizations that operate in the hybrid work environment of the future.

02 Efficient Resilience
HR leaders now realize that efficient organizations are actually fragile organizations. Rather than striving for efficiency, leading HR organizations now realize they need to build resilient organizations, leaders and employees so they are able to bounce back and thrive during disruptions.

03 Building a Diverse Leadership Bench
Despite the attention placed on building a more diverse workforce, progress has been slow and halting. The workforce and the communities in which organizations operate expect more. The pace of progress must speed up.

04 The New EVP
Employees’ expectations of their employers have shifted. Mental health, purpose and social responsibility are now critical components of the value proposition. HR executives must navigate the new realities of the labor market to meet their talent needs and the expectation of their employers.
