Introduction to Gartner IT Score for Sourcing & Procurement

Functional leaders use Gartner IT Score for Sourcing & Procurement to measure the maturity of their function in key activities, prioritize areas of improvement and plot the function’s path to improvement. This is an excerpt from a full report, which provides detail on a wide range of functional activities. Gartner IT Score for Sourcing & Procurement covers 11 functional activities across 4 functional objectives.

Here’s how it works

1. Measure the performance of the function in terms of:
   - Maturity. We ask a series of yes/no questions about how your function approaches and executes each one of a range of key activities and objectives specific to your function.
   - Importance. We ask you to indicate how important each of those activities is for your function to meet its enterprise objectives.

2. Prioritize.
   - See your maturity levels at a glance. On a simple bar graph, we plot the maturity level of each activity and its importance — and you get your first glimpse of where maturity and importance aren’t aligned. For example, your function may be highly mature in activities that aren’t very important to driving business priorities or highly immature in activities that are.
   - See your priorities in rank order, based on those gaps between maturity and importance. Immediately you can see what should be your highest priorities for improvement if your function is to drive business goals effectively. You also see which activities need less attention.

3. Improve. We provide you with steps to take on your path to improvement in whatever activities the data shows to be the biggest significant opportunities for improvement.
   - “A Pathway to Maturity” lists action steps required to reach the next level in each specific activity.
   - Recommended related resources provide associated insights. In some cases, a Gartner advisor delivers the report and helps with prioritization and action planning.

Read on for more insights and recommendations you might receive on an individual activity. A complete report shows you the current status and improvement path for all activities and objectives in your function.

How do maturity and importance compare?

Gartner IT Score for Sourcing & Procurement plots your benchmarked maturity score against the importance you assign to that activity in terms of its criticality for your function to meet enterprise business objectives.

Select Findings

Lowest Maturity
- Attract & Hire Talent
- Communicate Value Proposition

Highest Importance
- Develop Skills & Competencies
- Develop & Maintain Policy

What are the high-priority areas for your function?

Gartner IT Score for Sourcing & Procurement rank-orders your improvement priorities, based on the gap between maturity and importance. The Activity Priority Index (API) identifies where the function is less mature in activities of greater importance. A higher API score indicates a greater priority to the organization.

Highest Priority
- Attract & Hire Talent
- Develop & Maintain Policy
- Manage Objectives & Organization and more activities

Lowest Priority
- Manage IT Procurement Technology
- Develop & Maintain Sourcing Strategy
- Manage Acquisition Process

* Activity Priority Index: Activity Priority Index (API) for an activity is computed as average importance minus maturity multiplied by its average importance.
High-priority area: Manage Objectives & Organization

Gartner IT Score for Sourcing & Procurement provides next steps for each individual activity, based on current and desired state.

Path to Maturity
Start doing the following to achieve the next level of maturity:

• Develop IT procurement mission and charter.
• Update IT procurement objectives annually.
• Document IT procurement accountability and responsibility.

Level 1
There are no defined IT procurement objectives and organization

Level 2
Provide IT procurement support on an ad hoc basis without defined objectives

Level 3
Provide IT procurement support through dedicated staff Define IT procurement objectives

Level 4
Document IT procurement mission and charter Update IT procurement objectives annually Document IT procurement accountability and responsibility

Level 5
Adopt IT procurement objectives per changing business needs Adopt IT procurement organizational model as needed
