Hexing, founded in 1992, is a provider of smart products and power usage/distribution solutions for global customers in the power sector. Hexing is a multinational company in pursuit of “focus, innovation and customer orientation.” Today more than 90 countries across the world to utilizing Hexing products and solutions for a better tomorrow.

Industry: Utilities
Revenue: $500 million
Employees: Over 3,000
Driven by the increasingly global economy, Hexing is on a journey of "going global." With this journey comes the need to:

1. Accelerate digital transformation, be more competent in creating inner value, improve management, consolidate core competitiveness and expand share in foreign markets
2. Promote R&D and updates of products harnessing digital technology to boost product development and competitiveness
3. Raise brand awareness, be among the top players in the global market through excellent products, and build its reputation as a national brand

Using Gartner advice and research, including the Hype Cycle, Hexing built a SaaS visualization platform. To develop a program of continuous technology innovation, technical seminars are regularly held between Hexing and Gartner to discuss the most cutting-edge key technologies around the world, and share best practices in the industry. Through the use of Gartner research, analyst and expert engagement, and peer exchange Hexing is able to adapt product development and solutions more quickly than before.
