Gartner for IT Leaders

Expanding the Scope of Digitalization to Drive Business Value

Mission-critical priorities

- Understand the as-is digital capability to kick start a companywide digital awareness program that fits the organization’s level of maturity
- Avoid talking about digital capabilities that are too complex
- Start small to get the workforce and executives buy-in

How Gartner helped

- Gartner conducted two half-day interactive workshops attended by approximately 300 Q-Chem employees as well as an Executive-level focused meeting on digital transformation scenarios and opportunities
- The workshops leveraged several Gartner Assessment tools as well as live polls to test out the workforce’s willingness to embrace certain transformation initiatives

Business impact

With Gartner’s support, Q-Chem’s Information Systems Manager was able to:
- Prioritize the initiatives with higher impact and higher acceptance level across the workforce
- Fast track the digital strategy execution, building on the consensus across the workforce

Industry: Chemical Manufacturing
Revenue: ~800M USD (FY 2021)
Employees: 1,000+
Discover how Gartner has helped teams around the world tackle other critical priorities.
