How to create a one-page strategic plan that CIOs and IT Executives will actually use
Storytelling takes strategy from idea to action

Fit organizations — those that perform well in any market condition — distinguish themselves in part because they are great at creating, articulating and executing strategy in a way that maximizes results.

For companies that excel, the payoff is higher revenue and greater net income for the enterprise. But it takes a dynamic approach to strategy, where leaders adapt to changes in the marketplace, customer preferences and the enterprise’s competitive position.

Too many organizations instead talk of strategy in terms of the document they are creating — documents that are rarely used.

Storytelling captures the adaptive nature of great strategy and helps organizations quickly determine priorities and investments. From a one-page story to a one-page strategic plan, the narrative evolves from idea to action.

Heather Colella
VP Analyst, Gartner
Create your one-page IT strategy story

1. Know how you succeed
2. Understand your differentiators
3. Choose a viewpoint
4. Draw a picture
Companies that focus on one of these strategic approaches make more money than those that select two or more approaches to winning in the marketplace.
Use that strategy as a lens for delivering the story

**Ask:** Do we as an executive team understand what differentiates the enterprise?

The strategy approach serves as a lens for investments. What is a commodity for one approach (customer, operational excellence, product) can be a differentiator for another.

Develop a rich story by selecting a viewpoint and exploring the perspective

<table>
<thead>
<tr>
<th>Viewpoint</th>
<th>Answer a question (or two) in story form</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Stakeholder view</strong></td>
<td>Examples</td>
</tr>
<tr>
<td>What would that stakeholder group say about our company?</td>
<td>Customers: “Every time I call in, I'm on hold forever.”</td>
</tr>
<tr>
<td></td>
<td>Executives: “How can we determine our strengths if we don’t know our revenue and profits by products?”</td>
</tr>
<tr>
<td></td>
<td>Customer Service: “It takes me 10 minutes to boot up my system every morning.”</td>
</tr>
<tr>
<td></td>
<td>Distribution: “Do we have enough product to meet our daily forecast?”</td>
</tr>
<tr>
<td><strong>Process view</strong></td>
<td>Examples</td>
</tr>
<tr>
<td>What end-to-end issues exist with the current process?</td>
<td>• Minimal process handoffs</td>
</tr>
<tr>
<td>What works well? What does a “perfect” process look like?</td>
<td>• Decisions made in a single step</td>
</tr>
<tr>
<td>How do we know all this?</td>
<td>• Customers served as close to “immediately” as possible</td>
</tr>
<tr>
<td><strong>Capabilities view</strong></td>
<td>Example</td>
</tr>
<tr>
<td>What capabilities does the enterprise need to be more competitive (win) in the marketplace? What capabilities does IT need?</td>
<td>The ability to cross-sell products and services and the ability to launch new products monthly</td>
</tr>
</tbody>
</table>
Draw a picture using these tips and techniques

Resist the urge to build a strategic plan before you have created your strategy story.

- The “art” lies in an iterative process.
- Most people are better editors than creators: Resist the urge to make your draft “perfect.”
- Listen to the mantras used and stories and metaphors told by your business peers — those will lead you toward a viewpoint and a picture.
- Use this picture as a starter for every conversation about strategy, every change that has taken place and every success to date.
- There are stories and storylines. This is a story — use it as part of the storyline you want to tell.
Example: Think this strategy picture is too simple?

Work on a pictorial approach to storytelling.

This is the pictorial story of how an IT services company plans to move from delivering value for money to providing value-added solutions to customers:

• The foundation is service and cost.
• For IT to deliver value for both the business and the IT function itself, it must remove duplication and complexity.
• The top layer is where IT contributes to growing the business — by creating and delivering value-added solutions.

Storytelling like this offers a simple way for CIOs and their teams to determine which IT strategies and tactics will best execute the enterprise strategy and deliver the expected business value.
The strategic plan’s three foundational elements

### Three foundational elements of any strategic plan:

1. **Business Objectives**
   - Profitable growth
   - Operational excellence
   - Customer experience
   - Compliance excellence

2. **Business/IT Capabilities**
   - Changes required for key capabilities 1-1 (list here)
   - Changes required for key capabilities 2-1 (list here)
   - Changes required for key capabilities 3-1 (list here)
   - Changes required for key capabilities 4-1 (list here)

3. **Key performance indicators (KPIs)**
   - Metric/KPI 1
   - Metric/KPI 2
   - Metric/KPI 3
   - Metric/KPI 4
   - Metric/KPI 5
   - Metric/KPI 6
   - Metric/KPI 7
   - Metric/KPI 8

### Other key components:

4. Enabling capabilities and initiatives
5. Roadmap for deploying those enabling initiatives
6. Tracker of cross-enterprise dependencies and risks

</tr>
</tbody>
</table>

## Enabling Changes and Initiatives

- Transition to a product-centric delivery model
- Increase cloud-based infrastructure capacity
- Update to latest version of ERP
- Identify and run a pilot for product-centric delivery
- Increase warehouse automation with robotic process automation (RPA)
- Data-driven customer engagement
- Compliance management (e.g., GDPR)
- Build a scalable, cloud-based customer data platform

## Key Dependencies and Risks

- Channel sales capability changes (marketing)
- Warehouse optimization (supply chain)
- Data classification coding (corporate risk)

## Metrics/KPIs

- Year-over-year growth in channel sales orders
- Decrease backorder fulfillment time
- Increase click-through rate on product recommendations
- Year-over-year decline in number of compliance issues
- Decrease cost per user of ERP
