9 Actions for Winning Through a Recession
A 2022-2023 Playbook
Gartner research showed that only a very small number of companies broke away from the pack during the Great Recession (end-2007 to mid-2009) and sustained their performance for the subsequent decade.

As the threat of another downturn looms, it’s timely to revisit lessons learned — in particular, that outperformers win because of the decisive actions they take at the beginning of contractionary periods.

Outperformers:
• Commit before the downturn to the differentiating elements of their strategy to position themselves to power through uncertain times, not simply respond to them.
• Effectively balance top- and bottom-line growth across business conditions. Focusing only on cost-cutting has historically come at the expense of top-line growth.

Unique headwinds further complicate today’s operating environment, but the differentiating decisions clearly hinge on digital.

Among CEOs, 94% want to maintain or accelerate the already intense pace of digital transformation sparked by the pandemic, and 70% of CFOs expect digital technology to get more funding.

The imperative for organizations is placing the right digital bets at the right cost.
Navigating Recession Now Would Be Much More Difficult Given the Triple Squeeze

The Triple Squeeze
3 compounding pressures that most executives have likely never experienced

1. **Persistent high inflation**
   - 69% of CFOs still believe nonlabor input costs will rise significantly.

2. **Scarce, expensive talent**
   - 47% of CFOs find it difficult to find and hire enterprise talent.
   - 50% of CFOs still see a significant wave of workforce resignations.

3. **Global supply challenges**
   - 48% of CFOs believe supply chain volatility and shortages will last beyond 2022.
What Failure Sounds Like During Recession

What we hope you don’t have to tell the board in 2024:

“We cut costs too far and could not keep pace with demand when it returned.”

“Our costs kept increasing with inflation; now our margins are unattractive to investors.”

“We continued to spend aggressively on digital, but we did not capture the value like competitors.”

“Higher product pricing led to permanently losing market share.”

“Competitors out-innovated us with digital products and services.”

“Other companies secured great digital talent at a discount.”
Goal: Make the Right Trade-Offs to Improve Profitability While Funding Faster Digital Acceleration

CFO Plans for Digital Technology Spend (July 2022)

“"I’m telling my teams to fund digital acceleration by finding savings and inefficiencies.””

“"Our business leaders will need to live in an environment of trade-offs, which we haven’t had to do for a while.””

n = 154 CFOs and finance leaders
Q: Q8 from CFO Recession Planning Poll: Which spend categories do you plan to decrease/maintain/increase for the next 12 months?
Top Head of ERM Questions We’re Tackling for Clients

1. How are other risk function budgets changing in response to this environment?

2. How are other risk functions staying on top of key enterprise and emerging risks amid ongoing volatility?

3. How can I streamline risk management without negatively impacting business performance and taking on too much risk?

4. What scenario planning should we run with the business to improve preparation for the recession?

5. How should we help the organization handle change management risk?
9 Actions for Winning Through a Recession

1. Create a prioritized list of the trade-offs you will make in your budget, with a story about why.

2. Accelerate movement to the cloud, while paying attention to shifting pricing strategies from software providers as prices rise.

3. Radically challenge workflows and processes to make them faster, simpler and more agile for the long term.

4. Fundamentally rethink the way your company leverages humans (locations, hours, part- vs. full-time, in-house vs. outsource).

5. Clarify your employee value proposition (EVP) so you are positioned to attract and retain the right digital talent.

6. Aggressively source key digital talent that will shake loose and help accelerate your digital plans.

7. Develop a future vision of the customer and employee to accelerate the right digital investments for 2025.

8. Invest in predictive and autonomous digital projects that will make the organization faster and leaner.

9. Narrow the metrics you use to measure and manage digital initiatives to the few that align to outcomes.
Gartner’s Head of ERM Playbook for Navigating Recession

Sample research, benchmarks and other resources for winning in this period. Let us help you plan your unique step-by-step path.

Step 1: Benchmark Spend
- Gartner Budget & Efficiency Diagnostic for ERM
- Inquiry with a Gartner Advisor or Expert

Step 2: Assess Efficiency
- Identify Sustainable Cost Savings with Gartner Research
- Talk to a Peer on Gartner Peer Insights

Step 3: Prioritize Investments, Set New Success Measures
- ERM Score Diagnostic
