⁵ Includes legal and ethical considerations, stakeholder adoption, available skills and infrastructure readiness

● Low
 ●● Medium
 ●●● High
 ●●●● Very High

- 1 Price Optimization**
Uses AI to suggest optimal pricing for every deal.
- 2 Customer Lifetime Value Analysis**
Provides customer health scores for all kinds of activities (e.g., churn, upselling).
- 3 Lead Scoring**
Uses ML models to predict conversion likelihood, to prioritize sales leads.
- 4 Cross-Selling and Upselling**
Uses ML to identify new business opportunities for existing customers.
- 5 Demand Generation**
Identifies new prospect segments from known characteristics of known segments.
- 6 Territory Optimization**
Produces a balanced set of territories, based on geographic, account and product data.
- 7 Sales Content Personalization**
Uses ML algorithms to recommend personalized content to sellers for nurturing customers.
- 8 Lead Discovery**
Uses AI to automate routine business conversations and provide better lead qualification.
- 9 Knowledge Management**
Uses ML models to surface relevant information to sellers for managing customer requests better and faster.
- 10 Sales Forecasting**
Uses AI to predict sales forecasts based on historical data and seasonalities.
- 11 Guided Conversations**
Uses NLP to uncover customer sentiments and helps in guiding customer conversations.
- 12 Opportunity Scoring**
Uses AI to predict win probabilities by sales stage for prioritizing next steps.
- 13 Account Intelligence**
Uses AI to recommend curated content about the prospects/clients based on current news feeds.
- 14 Relationship Intelligence**
Uses AI to identify and suggest relevant business contacts within the seller's social network.
